Attn: Sean Corbin

Re: **Class 2 Permit Modification: Addition of Newly Listed Wastes per 40 CFR 270.42 (g):  
Safety-Kleen (Wichita) Inc., EPA ID. Number KSD 007246846**

Dear Mr. Corbin:

On August 6, 1998, the EPA listed as hazardous four wastes generated during petroleum refining, and assigned the following Waste Numbers to them: K169, K170, K171, K172. This rule was effective on February 8, 1999.

On February 5, 1999, this facility requested a Class 1 modification to our Hazardous Waste Permit in accordance with the provisions of 40 CFR 270.42(g) *Newly regulated wastes and units*, to permit the facility to manage these new wastes. In accordance with subparagraph (g)(iv), this facility now requests a Class 2 modification of our permit to add these newly listed wastes to the permit.

This facility has managed these newly listed wastes in the past, and anticipates the opportunity to manage them in the future.

The wastes to be added are:

K169 - Crude oil storage tank sediment from petroleum refining operations.

K170 - Clarified slurry oil storage tank sediment and/or in-line filter/separation solids from petroleum refining operations.

K171 - Spent hydrotreating catalyst from petroleum refining operations, including guard beds used to desulfurize feeds to other catalytic units.

K172 - Spent hydrorefining catalyst from petroleum refining operations, including guard beds used to desulfurize feeds to other catalytic units.

The quantity of each waste to be managed at this facility annually is estimated to be 60,000 pounds. The processes to be used are:

Container Storage (S01),  
Hazardous Waste Tank Storage (S02),  
Treatment in Tanks and Tank Management Activities (T01),  
Treatment in Containers and Container Management Activities (T04),  
Miscellaneous Mechanical Processing (X02).

SAFETY-KLEEN (WICHITA), INC.

2549 N. NEW YORK AVENUE

WICHITA, KS 67219

Parts A and B of our Hazardous Waste Permit Application will be changed to include these new wastes. Replacement pages are attached.

Notice of the modification request, as required by 40 CFR 270.42(b)(2), will be sent to all persons on the facility mailing list and to appropriate units of State and local government, and published in a major local newspaper within seven days of this request. Comments will be directed to Mr. Kamal at the address listed above. A public meeting will be held on Thursday, September 23 at 4 PM, in the meeting room in KDHE's South Central District office on the 6<sup>th</sup> floor of the State Office Building, 130 South Market Street in Wichita.

Thank you for your assistance in this matter. Please call me if you have any questions.

Sincerely,

  
Ronald K. Robertson, CHMM  
Facility Environmental Manager

#### XIV. Description of Hazardous Wastes

[illegible]

Safety-Kleen (Wichita), Inc.  
Waste List

EPA Hazardous  
Waste Number:

Hazardous Waste/Constituent:

---

K161 (T)	Purification solids (including filtration, evaporation, and centrifugation solids), bag house dust and floor sweepings from the production of dithiocarbamate acids and their salts. (This listing does not include K125 or K126.)
K169 (T)	Crude oil tank sediment from petroleum refining operations.
K170 (T)	Clarified slurry oil sediment from petroleum refining operations.
K171 (R,T)	Spent hydrotreating catalyst from petroleum refining operations, including guard beds used to desulfurize feeds to other catalytic reactors (this listing does not include inert support media).
K172 (R,T)	Spent hydrotreating catalyst from petroleum refining operations.

---

Basis for listing or class of hazardous waste:	
(I) Ignitable	Toxicity Characteristic Waste (E)
(C) Corrosive	Acute Hazardous Waste (H)
(R) Reactive	Toxic Waste (T)
